

# Pesticide Application Recordkeeping Facts

FDACS recommends recordkeeping for **all** pesticide applicators regulated by Chapter 487, F.S., using this form or similar format. When properly completed, this form meets restricted use pesticides and the Central Posting requirements for the federal Worker Protection Standard.

Requirements	Florida Pesticide Law (Restricted Use Pesticide Licensed Applicator)	Worker Protection Standards (All Agricultural Use Pesticides)
◆ Record Location	Applicator Records	Central Location 
◆ Recordkeeping Time	2 yrs after application date (Section 487.160, F.S.)	30 days after REI expiration time and/or application time (for pesticides without an REI) (40 CFR Part 170.122 & 170.222)

## Other WPS Pesticide Application Record Timing Considerations for Central Location

If field warning signs are posted for a treated area *before* an application, the pesticide record application information for that application shall be posted at the same time or earlier. The information shall be posted *before* the application takes place, if workers will be on the establishment during application. Otherwise, the information shall be posted at the *beginning* of any worker's first work period.

## Use warning signs correctly, it's the Law!

The signs shall be posted no sooner than **24 hours** before the scheduled application of the pesticide, remain posted throughout the application and any restricted entry interval. They must be removed within **3 days** after the end of the pesticide application, restricted-entry interval expiration time and before agricultural workers entry is permitted.
