Baker County

Embryology School Enrichment Program

Teacher Agreement

Embryology is a very exciting and rewarding experience for both the instructor and youth involved. However, this project comes with a great amount of responsibility. This unit requires taking care of chicken eggs, an incubator, and eventually baby chickens. The eggs and incubator require frequent monitoring and once the chicks hatch they require special care as well. Additionally, when the experience is over teachers are responsible for cleaning equipment and returning everything in the same condition that it was provided.

By signing this document, I am acknowledging that I am solely responsible for the proper use and care of incubators, turners, and any other equipment/books that are on loan from the Baker County Extension Service. I will take full responsibility for the monitoring and care of the eggs in my incubator and accept all of the responsibilities that come along with this project. This includes, but is not limited to: cleaning the incubator when the project is finished, disposing of rotten eggs, following safe health guidelines when youth are involved with the eggs and/or baby chicks, and collecting all equipment in one place to be taken back to the Baker County Extension Office. By signing, I am acknowledging this information and if I fail to carry out the terms of this agreement I recognize that I may not be allowed to participate in the Embryology School Enrichment Program in the future and may be responsible for costs to replace items.

_____ _____ _____

Teacher Signature **Date** **Incubator Kit Number**

_____

Teacher Name

Item Name	**Cost**
(a)IncuView Incubator/(b)Little Giant/(c)Hovabator Includes: fan kit, turner, and incubator	(a) $198.00 (b) $136.00 (c) $126.00
Candler	$12.00
